# R Markdown Output

#### Overview

This document has code embedded throughout. In the next section we will create a visualization using the already loaded dataset eth\_data:

datatable(eth\_data)

### Price Chart - Ethereum

## Python Code Example

```
import pandas as pd
# Create the Python object from R
df = r.cryptodata
# Show the new Python dataframe
df
##
            pair symbol
                         ask_1_price
                                            date_time_utc
          BTCUSD
                    BTC
                            38355.570 2021-05-25 06:00:01

                                                     NaT
##
## [12942 rows x 4 columns]
```

## *One more Python example*

The code below creates a new column price\_percentile that specifies if the price for the row was in the upper or lower 50th percentile of prices (BTC should be upper and ETH lower):

```
import numpy as np
# Create a new column based on the ask_1_price value:
df['price_percentile'] = np.where(df['ask_1_price'] >
                                  np.percentile(df['ask_1_price'], 50),
                            'upper 50th percentile of prices',
                            'lower 50th percentile of prices')
# Show modified dataframe:
df[['symbol', 'ask_1_price', 'price_percentile']]
##
         symbol ask_1_price
                                             price_percentile
## 0
           BTC
                   38355.570 upper 50th percentile of prices
## 1
           ETH
                    2593.605
                             lower 50th percentile of prices
## 2
            ETH
                    2587.717
                              lower 50th percentile of prices
## 3
           BTC
                   38377.970 upper 50th percentile of prices
## 4
           BTC
                   38319.330
                              upper 50th percentile of prices
## ...
            . . .
## 12937
                   11972.900 upper 50th percentile of prices
           BTC
           BTC
                              upper 50th percentile of prices
## 12938
                   11985.890
## 12939
           BTC
                   11997.470
                              upper 50th percentile of prices
## 12940
           BTC
                   10686.880
                             upper 50th percentile of prices
## 12941
            ETH
                     357.844 lower 50th percentile of prices
##
## [12942 rows x 3 columns]
